

Notes

- Purpose of project is to match musicians in need of musicians and musicians with venues
- Drop down for post will be –post and event like on next door
- Main features first (platform for people to connect) wanted features next (social platform)

Visitor

- As a visitor when I visit the landing page I would like more information/purpose regarding the application
- As a visitor, I would like to see an about us section with information about the app creators
- As a visitor when I click on sign-up I would like the application to let me put in my information and allow me to create an account
- When setting up my account I would like to be asked if I am a fan or band
- As a visitor whenever I click on login I would like to see a form that allows me to put in my information and the form takes me to my home feed.
- As a visitor, when I complete the registration form I expect/want to be told that I have successfully registered and be directed to a welcome screen.

User

- As a user when I sign in I want to put my information in and it automatically take me to my home feed/ welcome page
- ~~As a user, when I click on the forgot my password link I expect/want the ability to fill out my email address and have a password reset email that allows me to reset my password~~
- As a user when I sign in I want to see post related to concerts/gigs happening in my area (zip)
- As a user when I click on the search bar I want to be able to search for anything regarding what I typed in (general)
- As a user when I see a post or events I want to be able to see and give comments.

- As a user, I can click an “I’m interested” button shows I am interested in the post or event that the creator of the post can see
- As a user, I can create post/events for either upcoming gigs or needed musicians or anything involving their band
- As a user, I can get notifications and can see who is interested in my post
- As a user, I would like the ability to update user profile information
- As user, I can place my information in my bio/ contact field (it will be pre-populated with suggestions)
- As a user, I can update, delete profile information or post
- As a user, I can upload photos relevant to my post
- As a user, when viewing a profile, I can recommend or leave positive review

Admin

- As an admin, I have all access to users and post, to update or delete post and dispute issues that may arise

Must have features (feature list)

- Register users and login authorization
- Bio page
 - Skills
 - Location
 - Genre
 - Interest
 - Awards
 - Influences
 - Gallery section
- Create a post
- Individual post page

- Home theme page for user
- Specific users can affect only their post
- Allow users to logout
- Search functionality that allows users to search through the events, gigs, post, etc.
- Show the user's post on their profile page
- Dynamic navbar for logged in users and guest
- Allow users to update and delete post
- Allow users to update their profile information
- Error messages
- Allow user to choose category
- Allow a post to have an image
- Intended Redirects
- Implement a google maps/Geolocation API
- Mobile responsiveness
- Events page
- Post page
- Interact with other post/ show interest (comments and reactions)
- Updated notification widget on navbar (any type of reaction or comment etc.)

Features we would like

- Direct messaging option
- Groups
- Division of fan and musician
- Inclusion of other entertainers i.e. comedians
- Include general interactive Calendar with things going on that day
- Connect

- Have friends
 - Or acquaintances
- Share feature
 - Tag (3 dot menu)
- Newsletter
 - Letting you know bands are in your town (look at Spotify API)
- Share playlist on profile
- Link music
